Monarch Butterflies fly south for the winter like birds. Then they fly north in the spring. In some places, these colorful insects cover whole trees. Wow!

Growing Up... When butterfly eggs hatch, they look like little worms. These are called larvae. They eat, eat, eat and grow, grow, grow into long caterpillars.

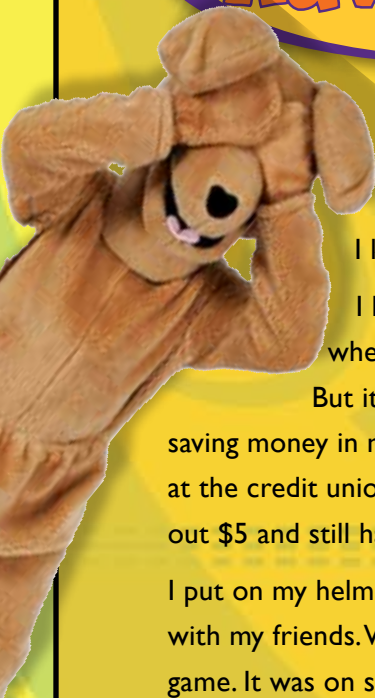

Changes... When the caterpillar has eaten enough it will attach itself to a twig. It will then shed its outer skin and form a chrysalis (kris-el-es). A few weeks later, the butterfly comes out to make the world a brighter place.

Go online and learn more or look for butterflies in your neighborhood.

Did You Know?

Kirby's Adventures

A few months ago, my grandparents sent me \$20 to go buy a toy for my birthday. Wow! I was so lucky.

I knew just what I wanted to get.

I had been wanting this video game where you hop and dance. It is so cool.

But it was \$25. Lucky for me, I had been saving money in my Kirby Kangaroo savings account at the credit union. I went to the credit union, took out \$5 and still had money in my account!

I put on my helmet and biked down to the toy store with my friends. When we got there, I found the game. It was on sale for \$22.99. I would get money back. The checkout person took my money, put the game in a bag, and gave me back \$2 and one cent.

There was part of me that wanted to spend it right away. But I was good. I put that \$2 into my Kirby Kangaroo savings account and put the penny in my koala coin bank at home.
